

## **FEATURES:**

- Patented power-delivery technology
- Unique target attachment method
- Durable, long-life rotary seals
- Compact design
- Non-proprietary target design
- Patented target water fill/drain feature

**Patented MC-Series End Block**

## **BENEFITS:**

- Highest reliability
- Simplest to install or retrofit
- Fastest target change available
- 1 hour annual maintenance
- 3 hour total end block rebuild
- Lowest maintenance cost
- Use targets from any vendor
- No inductive heating impact
- No galvanic corrosion

## **RETROFIT:**

- Coater modification and integration support available
- No lid modifications required
- Use existing utilities
- No changes to power, gas, or anodes
- Keep your current magnet assemblies or upgrade to the TRM-Bar™ or QRM-Bar™ magnetics
- Adaptable to your current target design
- Use for any length system

## **NEW SYSTEM INSTALLATIONS:**

- Available as individual end blocks, end blocks plus the TRM-Bar™ or QRM-Bar™ magnetics, or complete e-Cathode™ lid systems with drive and utilities - ready to drop-in.

## **UPGRADE PLANARS TO ROTARIES:**

- Increase the output and quality of your existing coater without adding chambers

Model	Power	V/A	Target (mm)
MC	Up to 100kW DC or 80 kHz MFAC	1000v/225A	Up to 2000

The MC-Series end block provides high-performance and reliability in a compact design
